45

10

Management in the IT sector plays a vital role. Importance of management in IT sector:

- It bridges gap between technology and business strategy.
- Make easier to meet market to a technology.
- Project are fast and efficiently completed by a proper management.
- There is good relationships between team leads and members.
- Employee can easily discuss with manager as management creates safe environment.
- It increases productivity that peaks the performance of a IT company.
- A good relationship establishes between a developer and clients where clients can demand their requirements and developer can update their system based on feedback. It brings new change in technology where both developers and clients will be satisfied.

Management helps improve the productivity and achieve project goals as follows:

- Management properly arranges the all resources and requirements.

Now a days Ag. Waterfall system is displaced by Agile, scrum, DevOps as a default development tool.

That can change the system frequently and easily. It increases productivity.

We can estimate budget, cost, technology, human resources for a production. This leads to achieve a goal efficiently.

- Management manages a project. A Engineering manager reviews, measures the availability of a project. Guide to project workers. Manages all employees.

There is also a feedback system from users. All this activities help to meet project goal. This make project successful and meets user requirements.

Qa
Levels of Management in an organization defines the hierarchy of a management system.

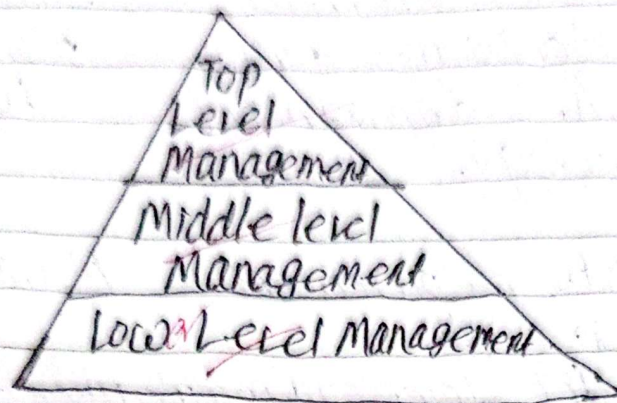

fig: pyramid of management levels.

There are 3 levels of Management.

i) Top Level Management

- It is top-level management, the highest authority.

- It needs strategic skill.

- Top-level Management decides the plans, policies and guide whole the organization in a specific direction.

- Eg: CEO, Board of Director, Managing Directors etc.

- Top level Management guides the Middle level Management.

ii) Middle Level Management

- It is lower level than top level management but upper than low level management.
- It needs to tactical skills.
- It makes decisions, plans, policies for a specific branch, department by following top-level's strategy.
- Example: HOD of department, Marketing Manager etc.
- It guides to low-level management and employees of a department.

iii) Low Level Management

- It is lowest level of management.
- It needs operational skills.
- It performs day to day activities of a organizations.
- It guides the employees.
- It follows the laws of middle-level organizations.
- Example: team lead of a project, Supervisor etc.

25
Henri Fayol's 14 Principles of Management
are:

i) Centralization

Centralization means management is done by a single unit. All managers gathered at a central place and having same motto.

ii) Initiative

Management is first initializing process. If it is done then peak the performance.

iii) Division of Workflow

Management divides the work in different divisions or departments that make simple tasks.

iv) Unity

Management is done by one person, which creates unity in work.

v) Stability of resources

Management utilizes resources, never waste it. This makes stable resources.

vi) Espirit the Morgans

There is strength in unity. This is believed by employees due to management.

vii) Remuneration of Employee

Management team fixes the salary of a employee. The salary must be clear.

viii) Uniformity

As all employees are guided same principles and decision is done by a manager. There is no confusion and conflicts arises.

ix) Scale chain

An organization has clear hierarchy level. Top level manager, middle level manager and supervisor.

x) Establish standards

Management establishes some laws or rules and regulations. All employees must follow it.

xi) Scalar

Management System is scalar. Anyone come can be added and employee can also leave organization if they want.

xii) Order

Order is command to give employee. Management is done by to order employees.

xiii) Discipline

Management establishes discipline. Employee follow it and become disciplined.

xiv) Authority and Responsibility

Authority is legal or official power to control others and responsibility is the task to have complete. Authorized responsible person perform management.

3a

Organization is the group of two or more people in a structured way to manages resources and activities to achieve a specific goal. Eg: a IT company is a organization. School, college etc.

There are 3 types of organizations:

- a) formal Organization
- b) Informal Organization
- c) Virtual Organization

a) Formal Organization

- It follows a structure and standards.
- Employees are in a hierarchical levels.
- Decision is make by a top-level management.
- Example: College, Mutt Bank etc.

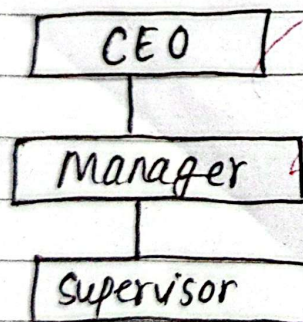

Fig: Formal Organization structure.

Advantages:

- It has a structure
- fast decision making

Disadvantages

- employees can ignored
- everyone cannot flow standards.

b) Informal Organization

- The organization which hasnot specific structure.
- Created by personal relationships and interest of works.
- it can be created anywhere and anytime.
- Example: teamworks, friendships etc.

→ Advantages:

- everyone are equally treated.
- employee can share their opinions, success, challenges etc.

→ Disadvantages:

- difficult to decision making as everyone has their own perception
- no flow of standards.

c) Virtual Organization

- It is the organization where employees are geographically dispersed and connected via network.
- Git, Github, email, zoom, googlemet, freelancing etc. are used for this.
- Example: Freelancing provider working to different freelancer from global, multinational company etc.

→ Advantages:

- global access for employee
- today's recent trend in IT sector.

→ Disadvantages:

- employee are lack of communication to each others.
- employee are not fully informed about organization

3b)

- Planning is the roadmaps for future tasks.

- Planning is the process of deciding what to do, where to do, how to do and who to do and perform the actions to meet the objective of a organization.

There are 3 levels of planning:

- a) Strategic plan
- b) Tactical "
- c) Operational "

a) Strategic plan

- It is the plan made by top-level management like CEO, Board of Managers.
- It defines the loco, policies, objective and goals of a organization.
- It is 3-5 year or more long term plan.
- It guides the tactical plan.
- It guides the overall organization by following specific standards.
- Highly skilled person is required for that.

Eg: A Engineering Manager manages the software development develop policies.

b) Tactical Plan

- The plan is made by Middle-level Management like departmental head, branch Manager.
- The plan is made for the department.
- It follows strategic plans and make policies, set goals, laws for a department.
- It is 1-2 years.
- Example: Marketing Manager makes marketing policies and plan how and where to sell a software.

c) Operational Planning

- The plan is made by low-level management.
- It makes plans for day to day activities of a organization.
- It can be daily, weekly or monthly.
- Example: A team lead of a project plans what to do today and what tomorrow.
- It follows the strategic plan and performs actions.

4a

- Motivation is encouraging to others.
 - Motivation is the process of guiding others to perform a task to meet specific goals.
- Example: A manager always guides to employee to do their respective tasks.

There are different types of motivations based on different factors.

i) Based on Origin

a) Intrinsic Motivation

- The motivation comes from yourself.
- You feel to do a task due to interest necessity.
- Example: Studying book because you love reading.

b) Extrinsic Motivation

- The motivation comes from external source.
- Others motivates you.
- Example: studying hard to get good grade

ii) Based on Result

a) Positive Motivation

- The motivation for good result or outcomes.
- It results well.
- Example: Doing work honestly to get recognition.

b) Negative Motivation

- The motivation for avoid from punishment.
- It is done to reduce negative activities.
- Example: Child do their homework protect from teachers punishment.

iii) Based on Monetary

a) Financial Motivation

- Motivated to get financial benefits.
- receiving bonus, salary, commission as a money.
- finding health insurance, retirement plans and monetary perks.

b) Non-Financial Motivation

- Motivated to get benefits except monetary achievement.
- Recognition, achievements, workforce positive environment, to get work with own desired hours etc.

4b)

Abraham Maslow's Need Hierarchy Theory of Motivation:

- Proposed by Abraham Maslow's in 1943 AD.
- He defines here the needs of a human to live for him/her.
- He clearly describes the human nature in his theory.
- It is 5-tiered can be represented in pyramid.

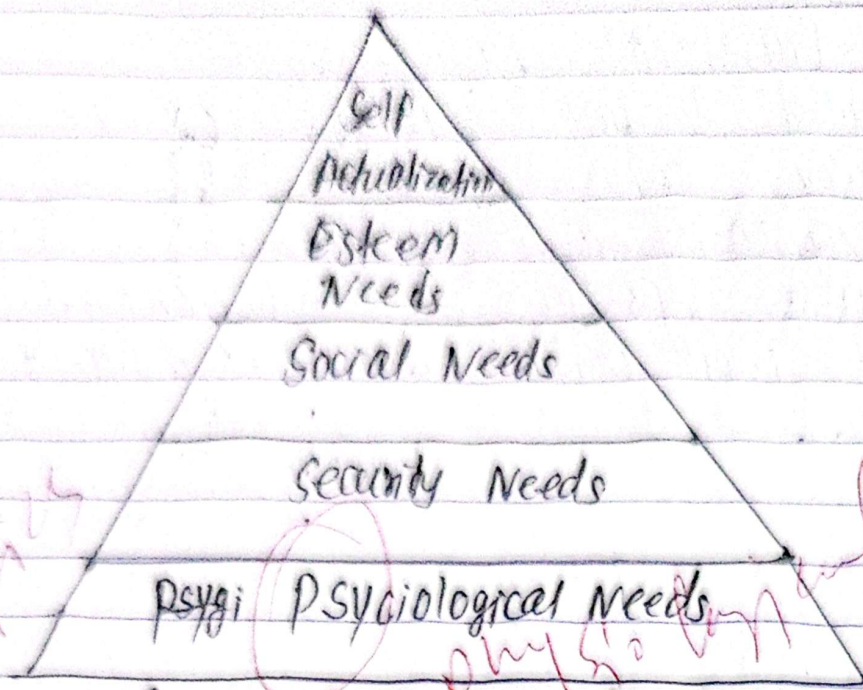

fig: Maslow's need theory of motivation

a) Psychological Needs

- It is the basic needs of a person to survive.

- A person must need food, clothes and shelter to live a simple life.

b) Security Needs

- After getting basic needing a person need to security.

- security, protection, save from attack etc.

c) Social Needs

- After getting basic needs and security a person need to socialization.

- love, belongings, social relationships are required.

d) Esteem Needs

- As a person get basic needs, security, social needs then he/she needs to esteem needs.
- A person has ego in this situation.
- he/she feel 'I am superior'.
- Self respect, recognition etc.

e) Self Actualization

- As all 4 needs getting a person feel who am I.
- It indicates full potential of a person.
- A person guide then to others.

• Advantages

- provide clear framework of real world.
- A higher need increases as getting lower needs.

• Disadvantages

- No empirical experiment.
- Needs varies from person to person.

5a

As Nepal is a Developing country and even had non-developed country so there are many issues for motivation.

Contemporary issues of motivation in Nepalese Organizations are:

a) Economy Constraints

As we know Nepal is a poor country which has low budgets. As a organization has less budget, economic resources so motivation is not become effective.

b) Political Instability

As recently political change. There are frequently change in minister, prime minister, parliament causes conflicts. There is no proper plan of leaders can decrease motivation.

c) Lack of Resources

As we have not enough resources like cost, human powers, technology and others requirements. This cannot motivate employees. As no resources employee cannot do task efficiently in proper way.

d) Brain Drain

As educated skilled people are going to abroad and resident those permanently loss the human power. As educated goes abroad remaining people be demotivated.

e) Lack of knowledge

In Organization employee are lack to knowledge. They are unaware about how to motivate others effectively. This causes demotivation.

f) UnEquility

As Nepalese Organization promotes corruption, favoritism, nepotism and choose own relatives demotivates the active, dynamic and skilled person. Discrimination in salary for samework among employees causes demotivations.

Except the demotivation factors there are motivation practices also like giving bonus, commission, rewards but they are inadequate and not effectively applied.

5b

Leadership is an art to influencing others to follow their wills, requirements and direction to achieve specific goals or objective.

For Leaderships three components are required.

- Leader : a person must lead others
- follower : a person must have followers
- Situation : a leader must react to the situation.

Types of Leadership :

① Single Leadership

- A leader leads only one person.
- It is done when there are only two person in a project. where a leads to others.
- The follower follow the leader and performs tasks. Both work together to get high performance.

Features of Planning:

a) Goal Oriented

A plan is done for getting a specific goal and fulfill the objectives.

b) Future Oriented

A plan is always for future tasks which gives roadmap for upcoming tasks and indicates the preparation.

c) Resources

To do a plan resources are required. Based on the available resources planning is done.

d) By Authorized People

Planning is done by the level of management in a organization. Employee must follow the prepared by Authorized People.

e) Direction

Planning provides direction to a organization and employee to perform a task.

f) Budget

Planning estimates budget and also done based on budget.

g) Reduce Risks and Failures

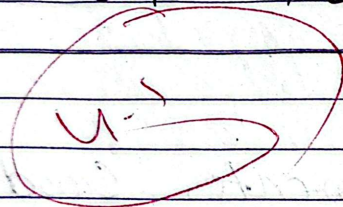

Planning is always oriented to reduce the risks and failures that come during complete a projects and practices for this are implemented.

h) Working Relationships

Planning establishes relationships between workers. As top level makes plan then it has relationship with middle level and middle level with lower level management.

i) Changeable

As time, resources and requirement varies planning also varies from one organization to others to meet their respective requirements.

6b

Financial Motivation:

The motivation which is done for getting financial benefits.

- A employee is motivated to do a task to get the monetary rewards.

Examples:

Salary: To get remuneration, monthly payment

Bonus: To get advance pay to perform a task

Commission: To find advance money for selling the goal-items.

Non-financial Motivation:

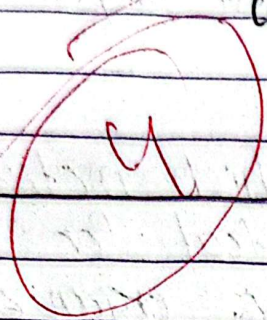

- The motivation which never provides money or financial reward.
- Instead it provides non-financial rewards, recognition, respect etc.

Example:

Recognition: Getting achievements, Good working certificates

Working Environment: getting positive workspace environment, good relationships between employee and manager culture

Flexible Worktime: Getting the chance to work in own flexible hours and times.

7a

Incentives

Incentives refers the rewards and well goods you get from a organization. When a employee work honestly, completely and most proper way he/she gets the incentives.

Incentives is a reward which motivates to employees. It is a good tool for motivating employees in a organization. Incentive can be financial or non-financial.

Financial incentives includes money, advance, bonus, commission, health insurance, pocket money etc.

Non-Financial incentives includes certifications of achievements, promotion, provides platform working execution team etc.

For example: A project members completed front-end development with a attractive framework last 2 days different than others then he/she can be provided by bonus or certifications.

7b Expectancy Theory

- Expectancy Theory is proposed by Victor Vroom in 1964 AD.
- It describes the expectations of an employee.
- It states that 'An employee perceives the fairness in the ratio of his/her work related to others'.
- If he/she gets discrimination he/she gets demotivated which reduces performance and can leave organization.

There are 3 steps in this:

a) Expectancy (Effort $\rightarrow$ Performance)

- It is believed that effort causes successful performance. If you doubt in your capability motivation decreases.

b) Instrumentality (Performance $\rightarrow$ Reward)

- An employee is motivated if ~~he~~ perform the task then get reward.
- If no reward demotivated.

c) Valence

- It is the value of reward.
- If you give high value to your reward you get motivated. If not value you get demotivated.
